

**“We are changing the world
one bottle at a time”**

—Boomerang Water

“No one wants to drink water from plastic bottles anymore.”

– Your customers, employees, and everyone else on the planet

Dear Plastics, your water bottles are *trash*.

“86% of disposable water bottles used in the United States become garbage or litter, adding 38 billion disposable water bottles in U.S. landfills.”

- Container Recycling Institute, July 2022

It's messed up;

Micro-plastics and chemicals are leaching in plastic bottles and are causing significant health problems

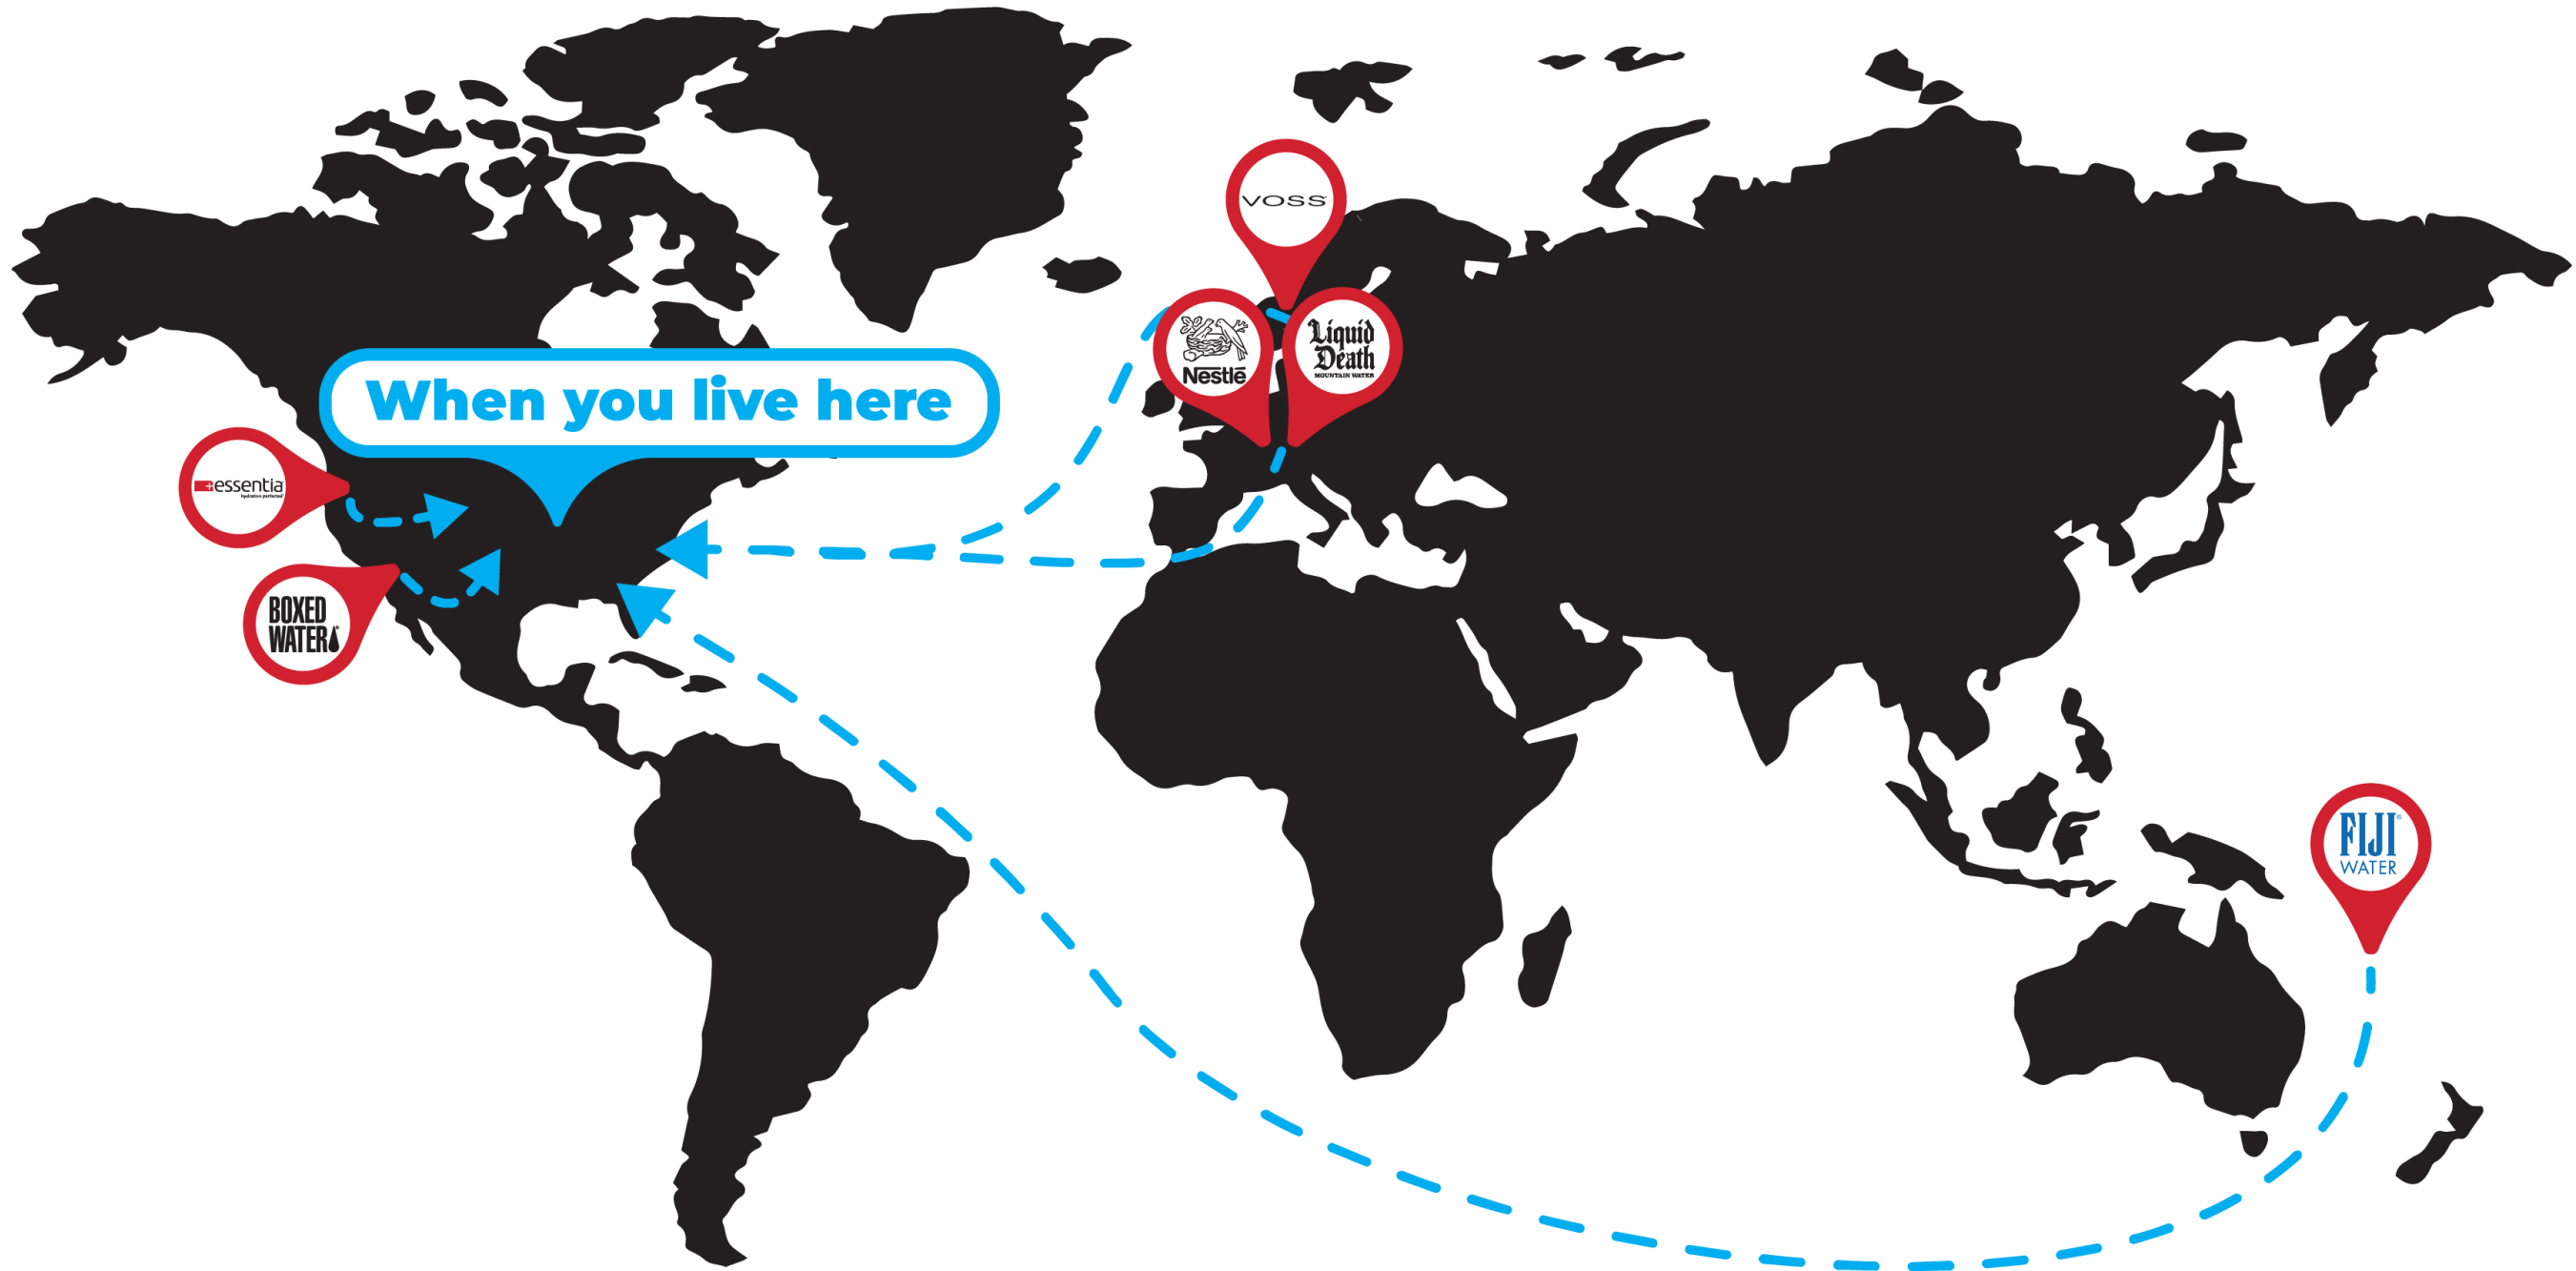

Plastic bottle waste kills over 1 million seabirds and 100,000 mammals per year.

But even those "sustainably packaged" water bottles require shipping and that only adds to your carbon footprint.

It makes no sense, why source your water from **here?**

Ready to say goodbye to plastics and hello to a brighter, more sustainable future?

Introducing the future of bottled water

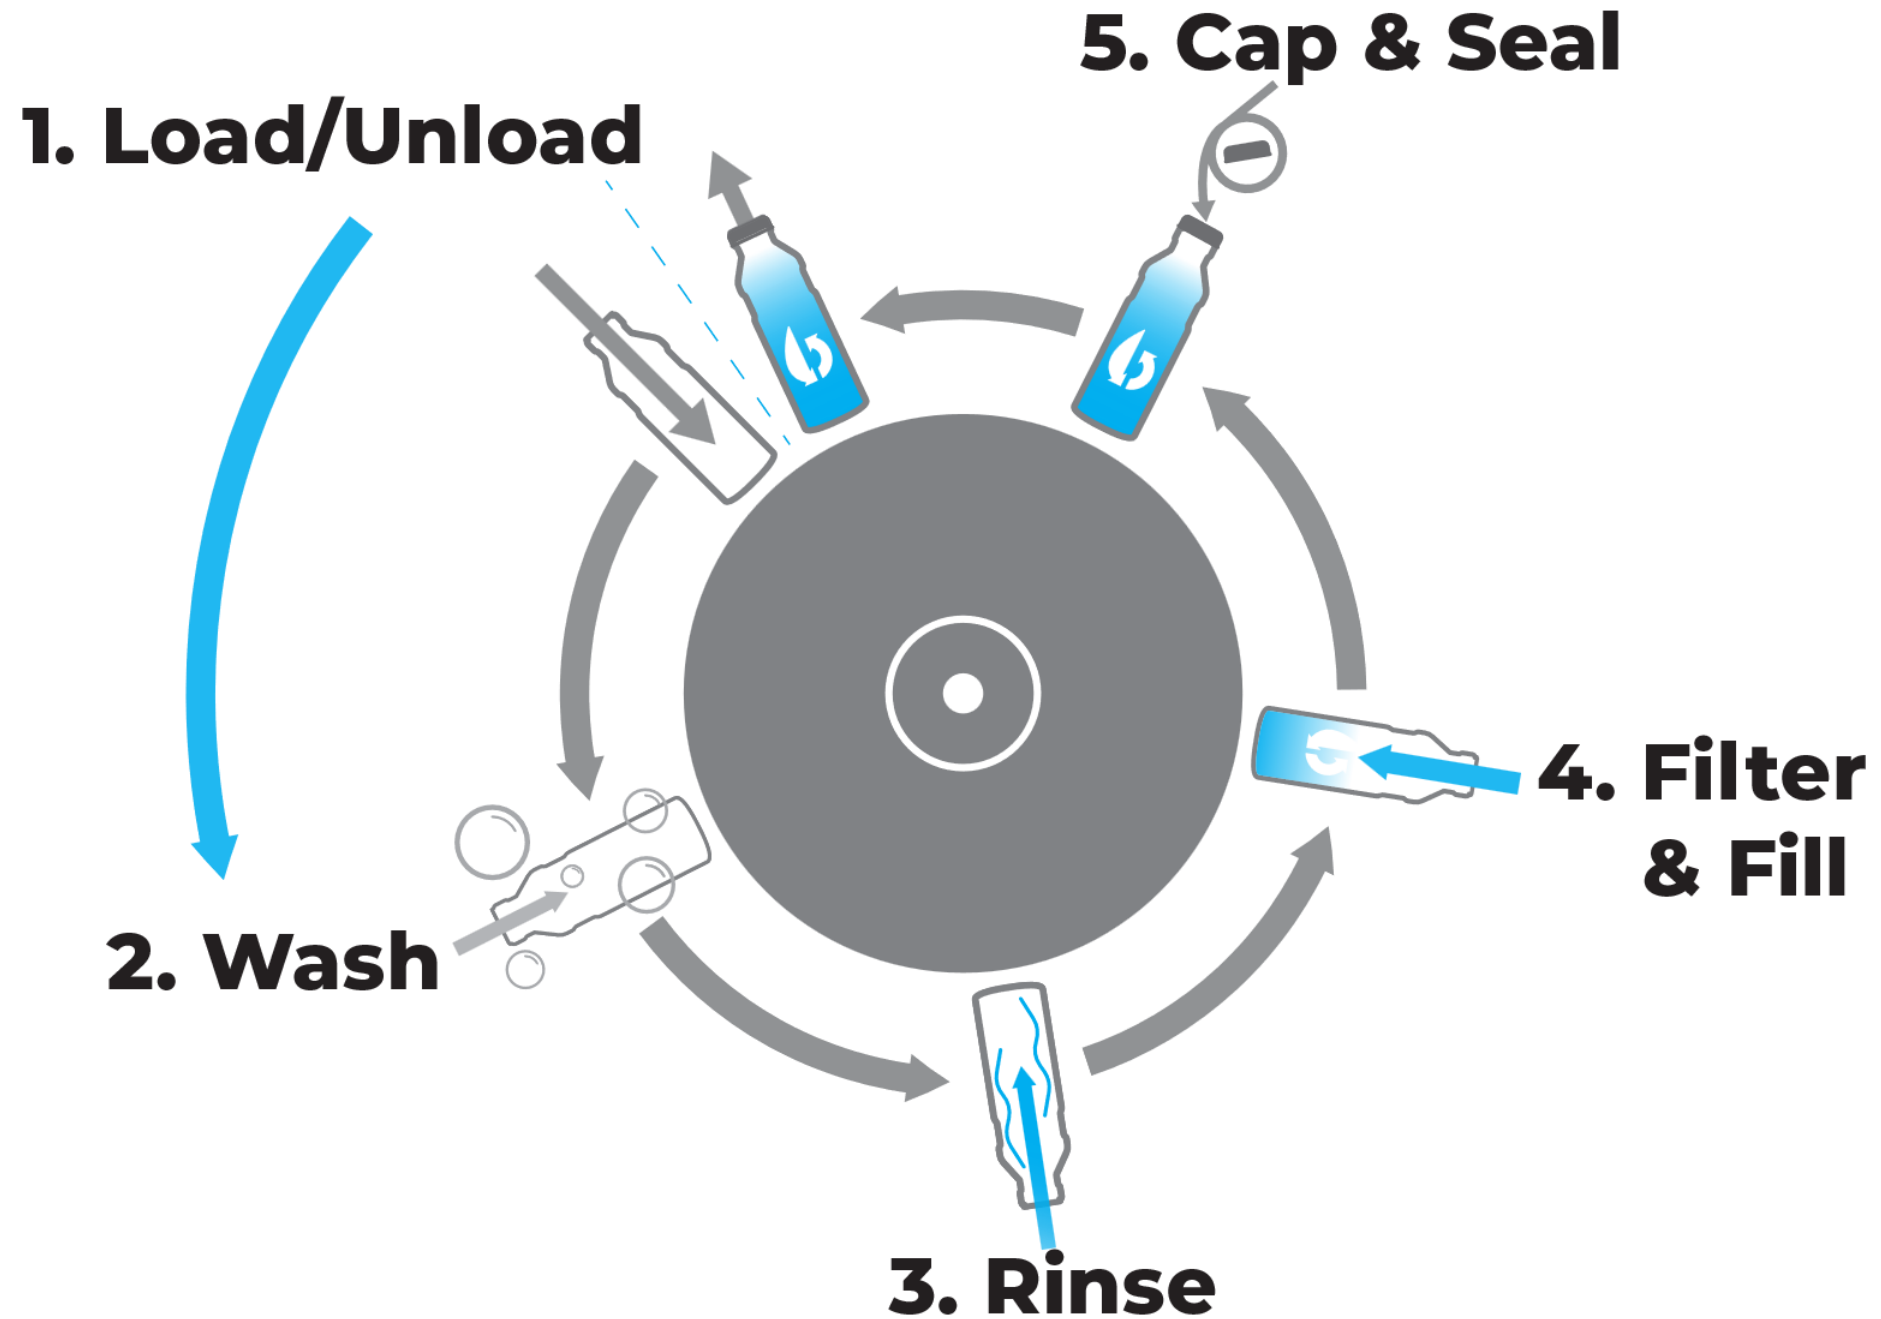

Close-loop your location with a Boomerang Bottling System (BBS)

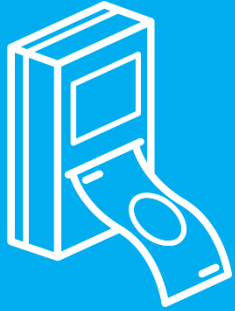

Returnable, refillable, reusable, and infinitely recyclable

A patented, semi-automated micro-bottling and custom filtration system that works together with your custom returnable glass and aluminum water bottles for an on-site solution to single use plastic bottles.

How it Works...

WE ARE NOT

A Vending Machine

A Refill Station

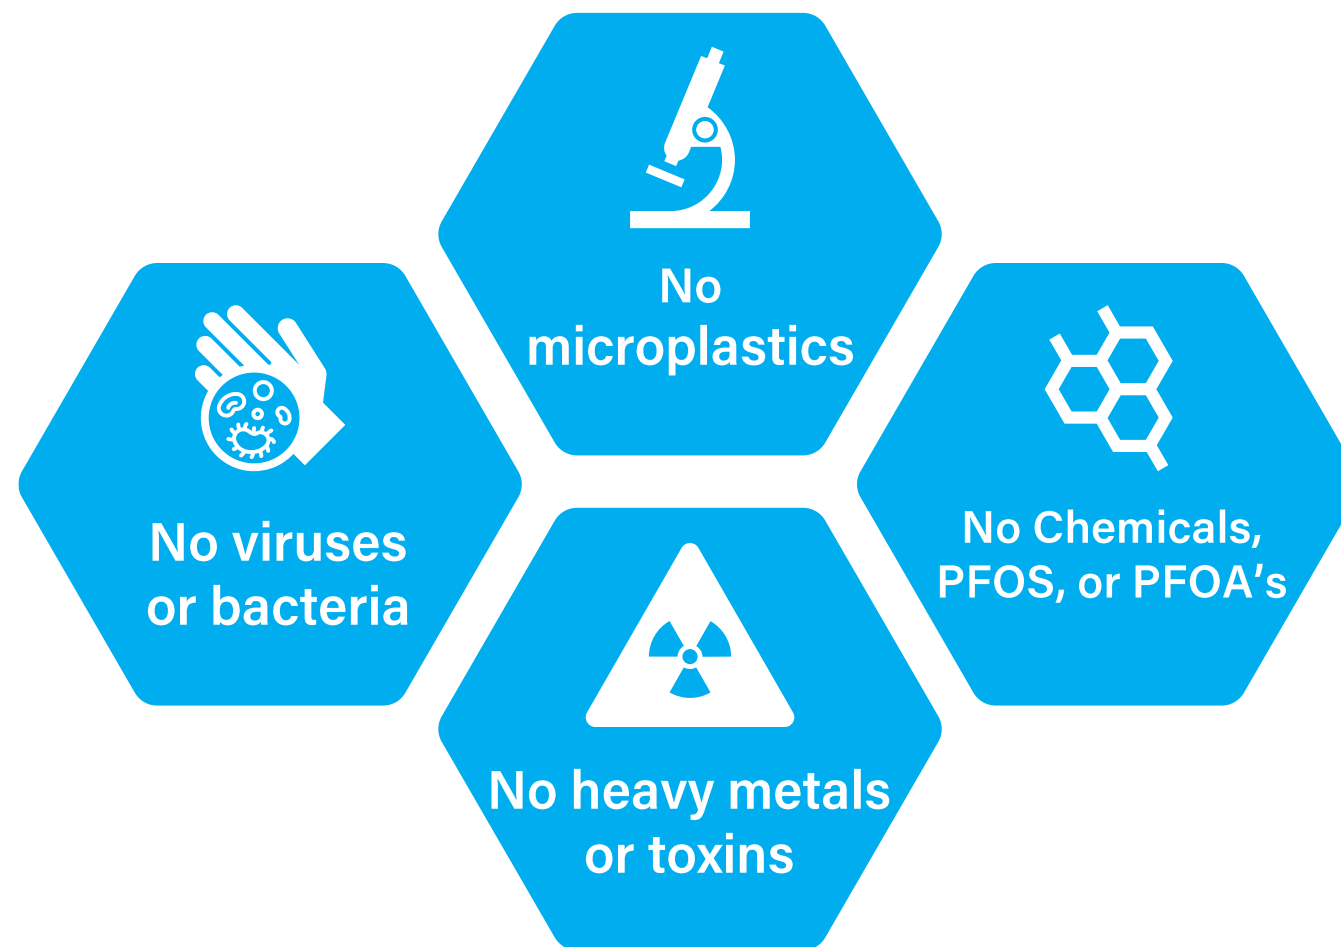

An
under-the-counter
filtration system

It's your water just way better

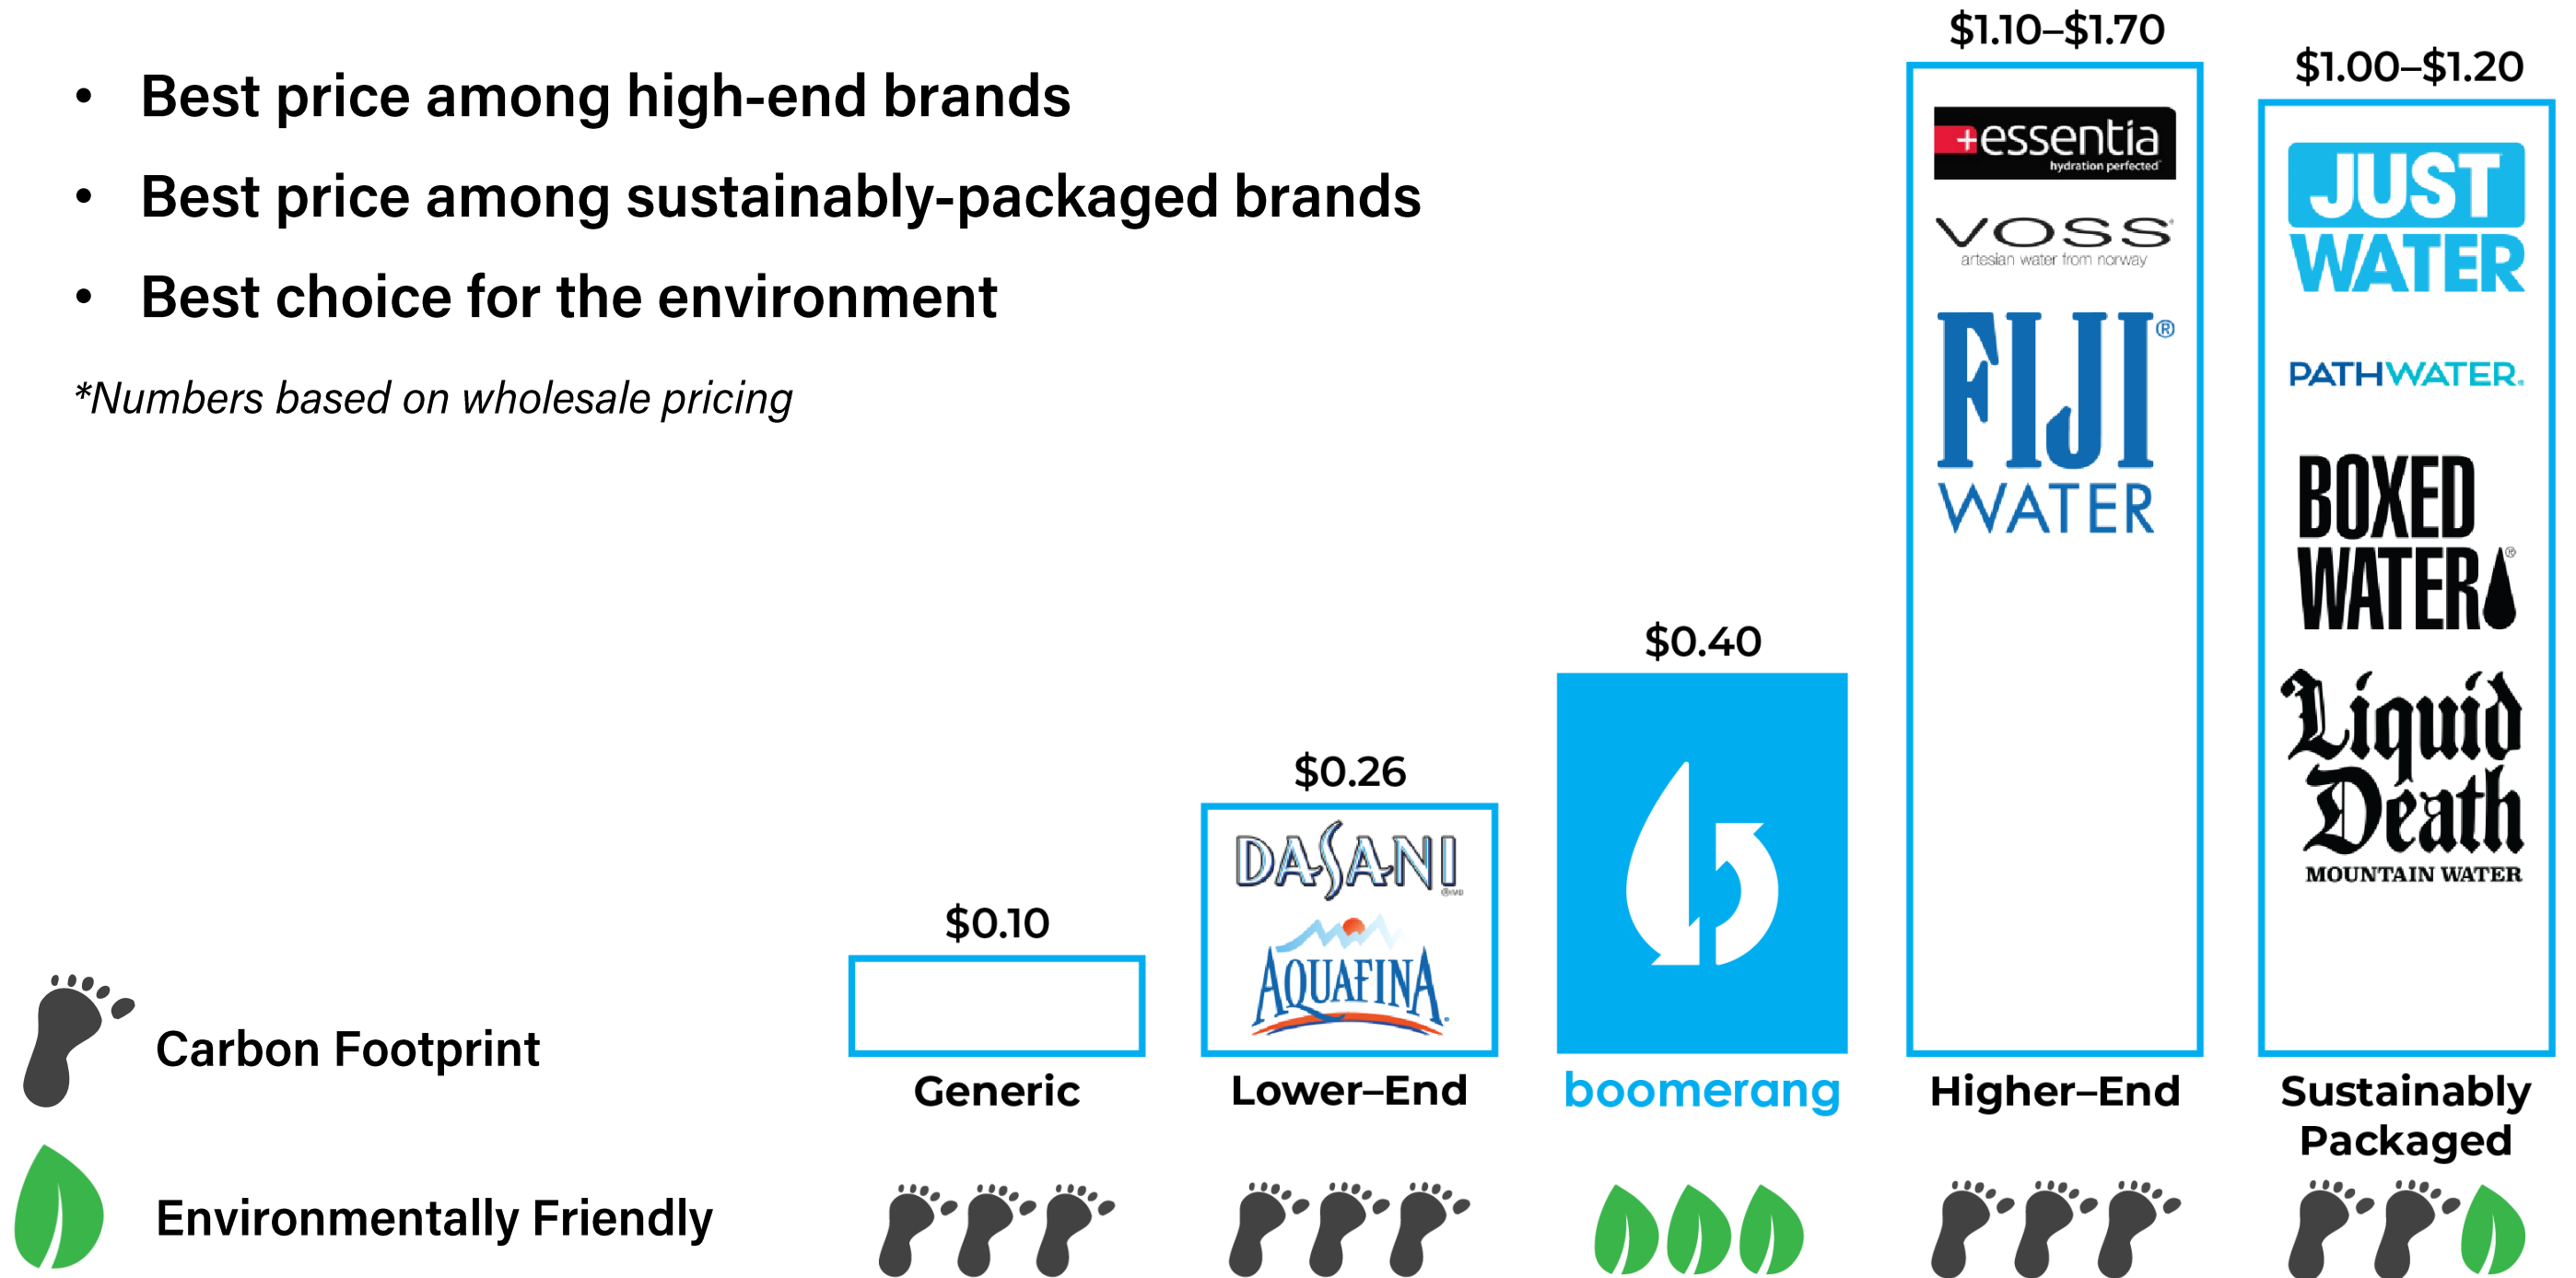

Pure, premium filtered water without the waste, or the bad stuff.

The Boomerang Advantage

- Best price among high-end brands
- Best price among sustainably-packaged brands
- Best choice for the environment

**Numbers based on wholesale pricing*

Carbon Footprint

Environmentally Friendly

Boomerang Program Overview

System Lease

Your lease covers system build cost, ongoing service, and monitoring

Supply Agreement

Your bottles and caps are ready as you need them

We've Got Your ESG

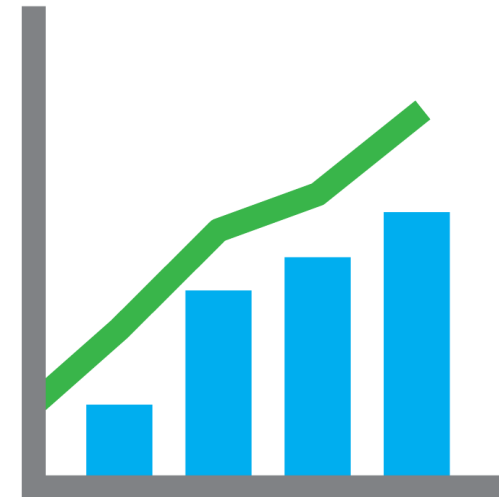

During your lease term, we provide you continued support in the form of:

Collect your returnable bottles to reduce your carbon footprint and close loop your business

A steady supply of re-usable and 100% recyclable bottles and caps for your BBS

Quality assurance monitoring and ESG monthly reporting

Empowering your employees to be more socially and environmentally conscious

We manage your supply chain so you don't have to

Have peace of mind with our vertically integrated supply chain, it's in-house manufacturing from procurement to delivery.

Because your bottles can be re-used hundreds of times over, your need to restock supplies is drastically reduced, insuring against supply chain disruption and reducing shipping costs

Sustainability goes with your brand

Show off your sustainability efforts with Boomerang's in-house digital printing capabilities.

ALPHA

METALLURGICAL RESOURCES

Company:

- Publicly listed
- Largest U.S. met coal producer

Application:

- Full containerized system at company's largest complex, serving 5 mines

Bottles/Day:

- 1,000 employees; 1.5 bottles/employee
- 1,500/day

Program:

- Lease, purchase custom bottles, silver caps, custom crates

Pro's:

- "Low hanging fruit" for ESG
- Employee benefit and morale booster
- Cost effective

FOUR SEASONS

Company:

- Owned by Michael Dell and Rob Walton

Application:

- System serves ~250 guest rooms, ~300 homes, 2 golf courses, 8 pools, multiple club houses, and 5 restaurants

Bottles/Day:

- Base customers: 1,200–1,500/day
- Member homes: 400–600/day

Program:

- 3-year lease on system, Boomerang bottles, and Boomerang caps

Pro's:

- Customers/Members focused on ESG
- Additional revenue opportunity

How cool is this? In one year Four Seasons Resort Hualalai will eliminate...

FOUR SEASONS

910,000 bottles from
landfills/waterways

27,999 pounds
of plastic

2,641 tons of CO²

**"...we are thrilled to debut
the Boomerang Bottling
System in an effort to
further strengthen our
mission to minimize waste
and keep Hawaii clean,"**
*– Charlie Parker, Regional Vice
President and General Manager,
Four Seasons Resort Hualalai*

Be a part of the change

“Be part of the solution,
not part of the pollution.”

How This Water Company Is Helping the Environment by Eliminating Plastic Waste

The CEO and CMO of Boomerang Water share how they're replacing single-use plastic water bottles with a sustainable small-batch bottling system.

JASON DIBBLE
DRINK DIFFERENT
HOW ONE BOTTLED WATER COMPANY IS MAKING WAVES IN A SEA OF PLASTIC

YOUR SOLUTION TO SINGLE USE PLASTIC IS JUST A TAP AWAY.

"Aluminum has a significant advantage in weight in where it can be used," said Jerrod Freund, the other co-founder of Boomerang Water. "When you think about where our system works, it's in resorts. It's in cruise ships. It's in places where glass is kind of a no-no. We believe that 80%-plus of the market that we will go into is actually going to use aluminum. So it really expanded our market potential."

230 AC, Single-Phase, 60 Amp Service

Deployment Options

Option 1: Standalone Boomerang Water system (installs back-of-house at your location)

Key Features-

- Boomerang Water Bottling System
- Slow Dip, Multi-Stage Water Filtration
- Bottles, Caps

Option 2: Complete Boomerang Water container (installs indoor/outdoor at your location)

Key Features-

- Positive Air Flow
- Stainless Steel Work Surfaces
- LED Lighting
- Bottles, Caps
- Crates for Storage & Recovery
- Boomerang Water Bottling System
- Slow Drip, Multi-Stage Water Filtration
- Bottle Washing System
- UV Air Purification

Our Founders

"After 20+ years on wall street as a corporate financier in the metals & mining sectors, I decided enough was enough - I had to do something that had a more positive impact in the world. I started with a passion to help build Boomerang for the betterment of the planet - that passion has now become my mission - there are very few "sustainability" initiatives that are as easy to execute that have an outsized impact than Boomerang."

— Jerrod Freund *Co-Founder*

"While serving four tours in Iraq and Afghanistan, I couldn't believe how many plastic water bottles were being flown in from far away places and discarded in burn pits. Sadly, things didn't look much better in the States, so I committed to finding a better way to bottle, distribute, and recover single-use water bottles. The answer wasn't following the obvious big beverage route, but instead doing it all on-site."

— Jason Dibble *Co-Founder*
